LIST OF PUBLICATIONS 2008 ACKNOWLEDGING EUROBIOBANK

Last updated 4th November 2008

LIST OF PUBLICATIONS **2008** ACKNOWLEDGING **EUROBIOBANK**

1. Benayoun B, Baghdiguian S, Lajmanovich A, Bartoli M, Daniele N, Gicquel E, Bourg N, Raynaud F, Pasquier M-A, Suel L, Lochmüller H, Lefranc G and Richard I. **NF-κB-dependent expression of the antiapoptotic factor c-FLIP is regulated by calpain 3, the protein involved in limb-girdle muscular dystrophy type 2A.** The FASEB Journal 2008;22:1521-1529

2. Dean G, Yeo T.W, Goris A, Taylor C.J, Goodman R.S, Elian M, Galea-Debono A, Aquilina A, Felice A, Vella M, Sawcer S, Compston D.A.S. ***HLA-DRB1* and multiple sclerosis in Malta**. Neurology 2008;70;101-105

3. Hicks D, Lampe A. K, Laval S. H, Allamand V, Jimenez-Mallebrera C, Walter M. C, Muntoni F, Quijano-Roy S, Richard P, Straub V, Lochmüller H. and Bushby K. M. D. **Cyclosporine A treatment for Ullrich congenital muscular dystrophy: a cellular study of mitochondrial dysfunction and its rescue.** Brain, November 2008; 1-9.

4. Lucchiari S, Pagliarani S, Corti S, Mancinelli E, Servida M, Fruguglietti E, Sansone V, Moggio M, Bresolin N, Comiand G.P, Meola G. **Colocalization of ribonuclear inclusions with muscle blind like-proteins in a family with myotonic dystrophy type 2 associated with a short CCTG expansion.** Journal of Neurological Sciences - Available online 18 September 2008

5. Nascimbeni AC, Fanin M, Tasca E, Angelini C. **Molecular pathology and enzyme processing in various phenotypes of acid maltase deficiency.** Neurology 2008;70:617-626

6. Pegoraro E, Borsato C, Bello, Dal F, Stramare R, Fanin M, Palu G, Angelini C. **Sphingomonas paucimobilis associated with localised calf myositis**. Journal of Neurology, Neurosurgery & Psychiatry 2008; 79(10):1194-1195

7. Saccone V, Palmieri M, Passamano L, Piluso G, Meroni G, Politano L, Nigro V. **Mutations that impair interaction properties of TRIM32 associated with limb-girdle muscular dystrophy 2H.** Human Mutation 2008; 29:240-247.

8. Schmidt J, Barthel K, Wrede A, Salajegheh M, Bahr M. and Dalakas M. **Interrelation of inflammation and APP in sIBM: IL-1β induces accumulation of β -amyloid in skeletal muscle.** Brain 2008; 131:1228-1240.

9. Schwab N, Waschbisch A, Wrobel B, Lochmüller H, Sommer C, Wiendl H. **Human myoblasts modulate the function of antigen-presenting cells,** J. Neuroimmunol. 2008 ; doi:10.1016/j.jneuroim.2008.06.012

10. Sorarù G, D'Ascenzo C, Polo A, Palmieri A, Baggio L, Vergani L, Gellera C, Moretto G, Pegoraro E, Angelini C. **Spinal and bulbar muscular atrophy: skeletal muscle pathology in male patients and heterozygous females.** J Neurol Sci. 2008;264:100-5

11. Sorarù G, D'Ascenzo C, Nicolao P, Volpe M, Martignago S, Palmieri A, Romeo V, Koutsikos K, Piccione F, Cima V, Pegoraro E, Angelini C. **Muscle histopathology in upper motor neuron-dominant amyotrophic lateral sclerosis.** Amyotrophic Lateral Sclerosis 2008; 9(5): 287 - 293

12. Spinazzi M, Fanin M, Melacini P, Nascimbeni AC, Angelini C. **Cardioembolic stroke in Danon disease.** Clin Genet. 2008;73:388-390

13. Spinazzi M, Cazzola S, Bortolozzi M, Baracca A, Loro E, Casarin A, Solaini G, Sgarbi G, Casalena G, Cenacchi G, Malena A, Frezza C, Carrara F, Angelini C, Scorrano L, Salviati L and Vergani L. **A novel deletion in the GTPase domain of *OPA1* causes defects in mitochondrial morphology and distribution, but not in function.** Human Molecular Genetics 2008; 17(21):3291-3302

14. Tahallah N, Brunelle A, De La Porte S and Laprévote O. **Lipid mapping in human dystrophic muscle by cluster-time-of-flight secondary ion mass spectrometry imaging.** Journal of Lipid Research, February 2008; 49: 438-454

15. Trimarco A, Torella A, Piluso G, Maria Ventriglia V, Politano L, Nigro V. **Log-PCR: a new tool for immediate and cost-effective diagnosis of up to 85% of dystrophin gene mutations.** Clinical Chemistry 2008; 54:673-681

16. Waschbisch A, Wintterle S, Lochmüller H, Walter MC, Wischhusen J, Kieseier BC, and Wiendl H. **Human Muscle Cells Express the Costimulatory Molecule B7-H3, which Modulates Muscle–Immune Interactions.** Arthritis and Rheumatism, November 2008; 58 (11): 3600–3608
